

# ECO-CAMPUS

Nanmen Junior High School

Our School Location

# Our Neighbor---Taipei Botanical Garden

We go bird-  
watching in the  
botanical garden.

# Our Neighbor---Taipei Botanical Garden

We had biology classes at the botanical garden.

# Pathway: sustainable food

We learned why food waste is a global problem.

# Pathway: sustainable food

We tried bread  
made from  
wheat grown in  
Taiwan.

# Pathway: sustainable food

We helped  
distribute food  
in a food bank.

# Pathway: sustainable food

We used overripe bananas to make pies.

# Pathway: sustainable food

We packed  
spare lunch for  
peers who are in  
need.

# Pathway: Consumption and Waste

We do recycling  
at school every  
day.

# Pathway: Consumption and Waste

We recycle paper, cans, plastic bottles, cartons, paper cups and so on.

# Pathway: Consumption and Waste

We used recycled bottles and other waste to make boats.

# Pathway: Consumption and Waste

Weekly CO2 Emissions

Class \_\_\_\_\_

Date \_\_\_\_\_

item	CO2 emission	daily usage (hr)	total emission (kg)	item	CO2 emission	daily usage	total emission (kg)
air conditioner	0.621kg/1h			plastic bottle	0.093kg/1		
fan	0.25kg/1h			carton	0.24kg/1		

We calculated CO2 emissions from the usage of plastic bottles and cartons.

# Pathway: energy

We' ll have an energy saving competition in the new semester.

Weekly CO2 Emissions      Class \_\_\_\_\_      Date \_\_\_\_\_

item	CO2 emission	daily usage (hr)	total emission (kg)	item	CO2 emission	daily usage	total emission (kg)
air conditioner	0.621kg/1h			plastic bottle	0.093kg/1		
fan	0.25kg/1h			carton	0.24kg/1
